

TRANSPORT ENVIRONMENTAL POLICY

At Rigips we strive to reduce the environmental impact associated with all transport operations, including energy use, emissions to air, water, soil and noise. Accordingly, the Board of Saint - Gobain Construction Products, Division in Szarbków, Poland undertakes to:

- Ensure the safety of our employees and suppliers while performing tasks related to preparation of cargo and transport, as well as during business trips;*
- Conduct activities to reduce the length of transport routes, the amount of transported cargo and the environmental impact of transport;*
- Implement solutions that lead to reduction of energy consumption, operating costs and emissions (for example implementing recommendations for parameters of owned and purchased vehicles);*
- Encourage all employees to use environmentally friendly transportation systems, including car sharing when travelling;*
- Avoid unnecessary travel – when planning meetings we ask all employees whether a remote communication tools would be possible to use (phone calls, video conferencing, teleconferencing etc.);*
- Conducting educational activities and promoting safe driving and eco-driving among employees;*
- Report performance against our transport policy to the stakeholders.*
